HIGH-TECH EVOLUTION IN CONSTRUCTION

21 MAR | EUROPEAN PARLIAMENT - BRUSSELS | CONSTRUCTION PRODUCTS EUROPE

Ociacia / shutterstock.com

Some of you may be well aware that our construction industry is made up of 3 million companies of which 95% are SMEs and 5% are world-leading multinationals headquartered in Europe. More so, the sector provides 42 million local skilled jobs and accounts for 29% of total employment across the whole EU.

What is less known is that the construction industry is undergoing an electronic evolution with robots, drones, artificial intelligence and many other developments. With the help of a great panel of experts, we would like to invite you to join us to discover these new technologies and to discuss the changes it will bring to the industry and to our built environment.

The event will be hosted by UK MEP **Catherine Stihler** and take place in the European Parliament in Brussels on 21st March, from 12:30 until 15:00.
